Passage 1

Life abounds in the open ocean. Scientists divide the ocean into different life zones, based on the depth to which sunlight **penetrates** the water. The lighted zone of the ocean is the upper 200 m or so. It is the home of the plankton that make up the foundation of the food chain in the open ocean. Below about 200 m is the dark zone of the ocean. Animals living in this region feed on material that floats down from the light zone, or **they** feed on each other. Plants do not grow here.

66- There are no plants below 200 m, most probably because.....

- 1) there is not enough light for photosynthesis
- 2) they are eaten by the animals living there
- 3) the water absorbs all the oxygen
- 4) their roots cannot reach the ground

67- The passage mainly discusses.....

- 1) the organism living in the ocean
- 2) how Ocean organisms feed
- 3) how deep the open ocean is
- 4) the major life regions in the ocean

68- The word "penetrates" in line 2 is closest in meaning to.....

- 1) make a hole in
- 2) travel into
- 3) warms
- 4) affects

69- It can be inferred from the passage that the planktone.....

- 1) is a small organism
- 2) feed on each other
- 3) use sunlight for food production
- 4) can live in both dark and lighted zones

70- According to the passage organism living in the dark region.....

- 1) need light for photosynthesis
- 2) cannot make their own food
- 3) cannot move easily
- 4) destroy the food chain

Passage 2

European nations came to the Americas to increase their wealth and broaden their influence over world affairs. The Spanish were among the first Europeans to explore the New World and the first to settle in what is now the United States.

By 1650, however, England had established a dominant presence on the Atlantic coast. The first colony was founded at Jamestown, Virginia, in 1607. Many of the people who settled in the New World came to escape religious persecution. The Pilgrims, founders of Plymouth, Massachusetts, arrived in 1620. In both Virginia and Massachusetts, the colonists flourished with some assistance from Native Americans. New World grains such as corn kept the colonists from starving while, in Virginia, tobacco provided a valuable cash crop. By the early 1700s enslaved Africans made up a growing percentage of the colonial population. By 1770, more than 2 million people lived and worked in Great Britain's 13 North American colonies.

71- Some British colonies made money by....

- 1) charging the Spanish colonies
- 2) creating useful art products
- 3) selling African slaves
- 4) farming and selling tobacco

72- Paragraph 2 mainly discusses....

- 1) how British colonies were established
- 2) how different locations were named
- 3) when Plymouth , Massachusetts , was founded
- 4) where African slaves lived and worked

73- It can be inferred from paragraph 2 that British colonies developed...

- 1) in desert areas
- 2) as a result of poverty
- 3) along the Atlantic coast
- 4) in the years following 1970

74- All of the following are mentioned as factors contributing to the success of British colonies EXCEPT....

- 1) tobacco
- 2) corn
- 3) Native Americans
- 4) the Spanish

75- According to the passage, Plymouth, Massachusetts, was founded by...

- 1) native Americans
- 2) religious settlers
- 3) Spanish settlers
- 4) African slaves

Passage 3

In the 1920s, new technology allowed filmmakers to attach to each film a soundtrack of speech, music and sound effects synchronized with the action on the screen. These sound films were initially distinguished by calling them talking pictures, or talkies. The next major step in the development of cinema was the introduction of color. While the addition of sound to film revolutionized the medium, quickly driving out silent movies, color was adopted more gradually. The public was relatively indifferent to color photography as opposed to black-and-white. But as color processes improved and became as affordable as black-and-white film, more and more movies were filmed in color after the end of World War II, as the industry in America came to view color an essential to attracting audiences in its competition with television, which remained a black-and-white medium until the mid-60s. By the end of the 1960s, color had become the norm for filmmakers.

76- All of the following statements are supported by the passage, EXCEPT.....

- 1) black and white films are no longer a major source of entertainment
- 2) the arrival of Sound films ended the popularity of silent movies
- 3) the film industry fell into a serious crisis after the end of World War II
- 4) the introduction of color to movies helped movie industry in its competition with TV

77- The passage mainly talks about...

- 1) how film making industry has survived
- 2) the comparative effects of Sound and color on movie industry
- 3) how Color was introduced and how color films were made
- 4) the effect of World War II on movie industry

78- According to the passage, people didn't show great interest in color movies because they were...

- 1) silent
- 2) expensive
- 3) interesting
- 4) less qualified

79- It can be inferred from the passage that the introduction of Sound films....

- 1) occurred at the time of the introduction of color films
- 2) was delayed until after the end of World War II
- 3) made color movies commercial
- 4) was an important milestone in the movie industry

80- According to the passage, which of the following is true?

- 1) the 1920s marked the end of Sound films
- 2) the transition to color films was not as rapid as the transition to sound films
- 3) color movies did not appear until the mid-60s
- 4) television didn't become popular until the mid-60s

Passage 4

Sometimes an animal copes with a changed situation, not by adapting to it, but by moving from it to another location. There it may still have to adapt, but the type of adaptation may be easier. There are primitive races of man that have attempted to avoid the pressures or changes that civilization brings. They have had to adjust to living in remote or harsh condition. Examples are the pygmies of the Congo who have escaped into the thickest jungles which are full of dangers. They have learned to obtain a living there and to cope with wild animals. African Bushmen manage to live off the arid Kalahari Desert where there is hardly any other life. Life is tough for the Bushmen but they are left in peace. These social adaptations could well lead to biological adaptations over a number of generations, but this is a very slow progress and it is unlikely that any one person would be aware of it taking place.

81- Which of the following conclusions is supported by the passage?

- 1) nobody knows how special changes happen
- 2) the slow change is not taking place today
- 3) social change may lead to biological change over time
- 4) there is not obligation for human beings to find a new location

82- The best title for this passage is....

- 1) animal adoption behavior versus human adoption behavior
- 2) man and adaption to the environment
- 3) how Congo primitives and bushmen survived
- 4) types of adoptions

83- According to the passage, instead of adapting, an animal..... .

- 1) goes around for finding a prey
- 2) prefer not to live in another environment
- 3) must find ways to feed itself
- 4) moves into a different habitat from time to time

84- It can be inferred from the passage that....

- 1) for primitive human being keeping the civilization alive was crucial
- 2) bushman used to live in humid places before moving to Kalahari Desert
- 3) primitives had to live in peaceful or harsh conditions
- 4) pygmies are short because of dealing with wild animal

85- According to the passage, an individual is unlikely to be aware of....

- 1) the fact that the bushman should be left in peace
- 2) cultural changes in new generation
- 3) the similarity of single individuals
- 4) biological adoptions derived from social adoptions
