Passage 1

Families in almost every country are changing. In North Africa, in the past many people lived in extended families. Fifty to a hundred people lived together in a group of houses. These were all the family members- grandparents, aunts, uncles, cousins, children, and grandchildren. But now this traditional family is breaking into smaller groups.

The traditional Japanese family was also an extended family- a son, his parents, his wife, his children, and his unmarried brothers and sisters. **They** lived together in his parent's home. But this tradition is changing. Now, most adults do not live with their parents. They have new problems. Men and women spend a lot of time at work. They don't spend a lot of time together as a family. This can be very difficult.

66. The word 'they' in line 7 refers to

- | | |
|-----------------------------------|---------------------|
| 1) unmarried brothers and sisters | 2) sons |
| 3) an extended family | 4) husband and wife |

| 3) some countries | 4) the majority of the countries |

68. North Africans lived in the past.

- | | |
|-------------------------|---------------------------------|
| 1) in extended families | 2) in fifty to a hundred houses |
| 3) together | 4) in small houses |

Rivers that are covered in ice can also lead to flooding. When ice begins to melt, the smaller pieces of ice can form a dam in the river, causing the water behind the dam to rise. If the dam breaks suddenly, then the large amount of water held behind the dam can flood the areas downstream too.

The same thing happens when a large human-made dam breaks or fails to hold the water collected behind it. Dams contain such huge amounts of water behind them that when sudden breaks occur, the destructive force of the water is like a great tidal wave. Unleashed dam waters can travel tens of kilometers and can destroy everything in their path.

Although scientists cannot always predict exactly when floods will occur, they do know a great deal about when floods are likely, or probably, going to occur. Deep snow, ice-covered rivers, and weak dams are all strong conditions for potential flooding. Hopefully, this knowledge of why floods happen can help us reduce the damage they cause.

71. Flood is more likely to happen when

- 1) the ground is not frozen 2) the ground is frozen
3) rivers are at their full capacity 4) a large human-made dam breaks

72. According to the passage, the most common natural disaster is

77. In line 5 the word “which” refers to

- 1) muscle spasm or shivering 2) a metabolic problem
3) heat regulation mechanisms 4) a cold environment

78. According to paragraph 1, all of the following are effective in keeping the body heat in humans EXCEPT:

- 1) blood pressure 2) shivering 3) low blood flow 4) high metabolism

79. The word “transferred out” in line 6 is closest in meaning to:

- 1) added 2) assessed 3) absorbed in 4) spread out

80. It can be inferred from paragraph 2 that the main mechanism of heat loss during sports activities is through :

- 1) high blood pressure 2) low metabolism
3) sweating 4) drinking water

Passage 4

The ancient Egyptians lived in narrow bands of land on each side of the Nile. They called this region the black land because of the fertile soil that the floods deposited. The red land was the barren desert beyond the fertile region. Weather in Egypt was almost always the same. Eight months of the year were sunny and hot. The four months of winter were sunny but cooler. Most of the region received only an inch of rain a year. The parts of Egypt not near the Nile were deserts. The harsh desert acted as a barrier to keep out enemies. The Mediterranean coast was swampy and lacked good harbors. for these reasons, early Egyptians stayed close to home.

81. The main function of the red land was that it

- 1) provided soil for the black land
- 2) protected Egyptians from invaders
- 3) contained some safe and good harbors
- 4) separated Egypt into two parts

82. The passage mainly discusses the...

- 1) type of weather in ancient Egypt
- 2) importance of the Nile for farming
- 3) geographic features of ancient Egypt
- 4) lifestyle of ancient Egyptians

83. The word barren in line 3 is closest in meaning to....

- 1) unfertile 2) large 3) remote 4) wide

84. The word "they" in line 1 refers to.....

- 1) Egyptians 2) bands
3) floods 4) months

85. It can be inferred from the passage that Egyptians grew their crops.....

- 1) during the months of winter 2) on the Mediterranean coast
3) when there was a lot of rain 4) on the banks of the Nile
